Aza-Tech LLC is a company that was established in 2014 and from the very beginning it has been based on knowledge and experience of both industrial and academic nature. The use of the latest technological solutions, care for the quality of production and order timekeeping is the basis for cooperation with our contractors.

Aza-Tech LLC offers a wide range of services ranging from CAD / CAM design, production (including CNC machining) and painting of ready-made elements or structures. We make individual details as well as serial machining.

Our machinery park and experienced staff allow us to offer you the highest quality of services and at the same time we can be helpful in solving all construction and technological problems while working on prototypes of machine parts or complete devices.
