**Other services**

The MIX GRAF company started its activity as a wholesaler of printing articles. Since 2000, following the needs of customers, it has expanded its offer. First of all, with products necessary in the printing industry and used to equip a professional ink mixing room, and then towards cutting tools necessary in many market segments.

In 2006, the company introduced the sale and service of knives, punching dies, drills and other cutting tools.

Currently, it creates the only nationwide network of grinding shops in Poland with locations in Lublin, Tychy, Warsaw and Wrocław.

Thanks to many years of constant and high-level work, it has become recognized as experts in the field of regrinding tools with tungsten carbide and powder steels.

The modern machinery of the MIX GRAF company allows for sharpening industrial knives up to 4 m in length, circular knives up to 700 mm in diameter, cylindrical grinding up to a diameter of 280 mm with a maximum length of 1000 mm and various specialist tools.

The core of the company is a qualified team of grinders - experts in their profession, treating all the tools that come into their hands with the same care.
