www.nabor.pl

The NABOR company has existed since 1983.

The company consists of three specialized divisions: elastomer processing, machining and plastic working.

In the field of metal processing, the company's two divisions offer products and services in the areas of: laser cutting, bending, welding, surface processing, assembly, milling - 3, 4 and 5 axes, turning, grinding, EDM, drilling. Our goal is to provide our customers with the highest quality products, which is why we have been improving and developing our production methods for over 30 years by implementing solutions that contribute to the success of our clients in Poland and abroad.

We have the following quality certificates: AS9100, IATF, ISO9001, ISO14001

Over 70% of our orders are export contracts.

We produce for the aviation, automotive, food and other industries.

We offer precisely manufactured rubber, rubber-metal and metal products. We provide comprehensive construction and technology, production and logistics facilities.
