lubelskie

Categories of services:
Machining
Cutting
Other services

Rad-Stal bis s.c. exists on the market since 1990.

We deal with machining and EDM from design through manufacture and implementation to production.

We are characterized by qualified staff and many years of experience in the production of metal parts and non-metallic parts.

We have three three- and four-axis machining centers in our machine park, lathes with driven tools, electric wire cut-off machine, plunger, hole punch from 0.3mm, as well as many conventional machines.
