Cutting

Samet. Ltd. has over 20 years of experience in designing and producing wide range of containers, receptacles and steel constructions.

Our product scope include, among others, open steel containers, containers with the roof, special containers, containers for presses, waste segregation containers, platforms, tilting containers for forklifts TK, DL, shovels/buckets, steel skips and all kinds of other metal structures.

Our design department and newly enlarged extensive machinery park provide professional and reliable production. We use only the highest quality steel sheet standard S235, and S355, Hardox and Domex. Each product is shot blasted to the first grade of purity, corrosion protected with primer and topcoat painted in any RAL color ordered by the customer. 80 highly skilled employees ensures that each product leaving our company meet the highest standards of quality, because we believe that only such product is able to satisfy our customers.

The proof of high quality of our products - the optimal combination of strength, proven technical solutions and good appearance - is a wide group of satisfied customers, both in Poland and in Western European countries such as Denmark, Sweden, France, Belgium. the Netherlands and Switzerland
