Voivodeship:
lubelskie

Categories of services:

Machining
Surface treatment
Welding
Other services

The company specializes in the production of machines for automation of production processes. Our goal is to increase production efficiency through automation.

We have a design space with computer and programming facilities. We build control cabinets, control panels, according to documentation entrusted or developed by us based on the provided assumptions. The equipment used comes from reputable world producers.

The equipment of the cabinet next to the control equipment includes safety devices and air conditioning. The cabinets are made in accordance with the requirements of the harmonized PN-EN standards and bear the relevant declarations of conformity.
