Other services

Since 1991 the manufacturer of machine parts such as:

- straight or diagonal cylindrical gear wheel with max. 8mm module
- conical gear wheel: straight or arched
- wheel chain
- worm wheel
- pulley: toothed, wedge or flat
- parts of the planetary gear
- wheel, shaft, shaft with spline
- repairs of gears

All parts are made based on: design documentation delivered or made by us, as well as on the basis of the provided patterns (new, damaged or worn out). The parts are made of various materials, among others: ordinary and stainless steel, cast iron, brass, bronze, aluminum, plastic, etc., depending on the client's requirements and needs.

Steel parts can be made in the raw state or heat treated (tempered) or thermo-chemically (carburized and hardened, nitrided). We are convinced that the effects of cooperation will be visible and give you reasons to be satisfied, and the company WALCE s.c. it will be competent for you and a professional partner.
