**Other services**

EDBAK Sp. z o.o. is a Polish manufacturing company operating since 1992. The company is a leader on the Polish market and a well-known brand on the European market in the manufacturing of display and projector mounting systems. Its offer includes over 200 cutting-edge products. The company also implements custom innovative solutions for the AV and Digital Signage industries. These include video conference trolleys and stands, multi-monitor video walls, display and projector mounts, information kiosks and many attractive solutions for retail. Edbak exports its products and solutions to many countries in Europe, Asia, Africa and the United States. The company has its own research and development office, where designers work with 3D software to enable quick product design and visualisation.

Edbak also manufactures metal components for many industries. The company provides cooperation services in the field of sheet metal forming, laser cutting of tubes and profiles, machining on CNC machines and welding services. In the modern machine fleet, there are, among others, modern TOS and Haas CNC milling and machining machines as well as Cloos welding robots.
