Biocent is the producer of a highly technologically advanced products used in engineered construction. Currently, we are one of the leading Polish producers of equipment for purifying and pumping sewage and meteoric waters.

A wide range of products allows us to satisfy the needs of various customers. We possess our own modern equipment base and highly qualified staff. We are one of the few producers who produce the units ourselves while all the assembly work is performed by our qualified staff which guarantees the highest quality and reliability.

We believe that both our broad range of products as well as technical customer service will meet your expectations and therefore you will soon join and become our satisfied customers.
