Machining
Surface treatment
Plastic processing
Cutting
Other services

Production of welding machines with particular emphasis on machines with variable roll geometry for rolling and straightening sheets with a thickness of 15mm to 100mm.

In addition, our offer also includes commercial goods - metalworking machines and devices designed and built only by the best European manufacturers, such as OMERA, MECOLPRESS, WARCOM, SERVOPRESSE, TIMAC, HERRBLITZ or CEMSA.

Together with our partners, we guarantee our customers broad support in the selection of optimal technology - from typical machines to devices often made to measure and highly suited to the production needs of the customer, as well as solid technical support for our machine service.
