Other services

Dynamically developing manufacturing company, which dates back to 1937.

Manufacturer of a wide range of metal components from raw material to final painted product. The company provides CNC machining, steel forming, welding, and powder coating services. In this regard, it cooperates with the largest manufacturers of construction machinery and formwork systems in the world.

Continuous investment in new technologies and modern machinery allows us to keep pace with current trends in the Polish and European markets.
