Voivodeship:  
lubelskie

Categories of services:  
**Machining**  
**Welding**  
**Other services**

Our company was established in 1993 as a small design – service firm focused on designing and producing of machines for food, chemistry, process and environmental protection industry.

Since the beginning of our company we are improving our qualifications, which helped us elaborate and implement many unique technical solutions and thanks to that perform modernization of machines in production lines in food industry – especially in confectionery and milk processing trade. Also, basing on our technical elaborations, we are developing production of veterinary and R&D equipment.

Between 2014 – 2016 we were participating in realization of “Business Social Responsibility” project co-financed from resources of European Union under which we developed and implement “Code of Ethics”.
