Laboratory
Other services

Lublin University of Technology (LUT) has been a major education and technical advisory center in the city of Lublin and the region for over 70 years.

The significance of this hub of technical sciences has been on a steady rise. Owing to its active role in social and economic life, the university plays a vital integrating and culturegenerating function. Its research and educational activities strongly contribute to the development of the region. The status of the region in the united Europe will depend upon how competitive both the manufacturing sector and specialized services fields are.

As a consequence, the support in this area has become a critical element of the university's mission.

At present, there are six faculties in the organizational structure of Lublin University of Technology:

- The Faculty of Mechanical Engineering
- The Faculty of Electrical Engineering and Computer Science
- The Faculty of Civil Engineering and Architecture
- The Faculty of Environmental Engineering
- The Faculty of Fundamentals of Technology
- The Faculty of Management
