BIOCENT S.A. is a Polish manufacturer of technologically advanced equipment and systems for water engineering and infrastructure construction. For over 15 years, the company has been providing solutions for wastewater and stormwater pretreatment, retention and transport.

Its product portfolio includes BIOLIFT wastewater pumping stations compliant with the requirements of EN 12050, wastewater pressure pumping stations, grease separators, oil and hydrocarbon separators, retention tanks, flow regulators, access covers, non-return valves, and channel and wall-mounted penstocks.

BIOCENT S.A.'s key strengths include a team of over 50 specialists, its own modern production facilities, an in-house engineering department, and continuous product development through R&D activities. The company manages the entire process, from product selection and engineering through manufacturing and installation to after-sales service. Its quality management system complies with ISO 9001:2015.

BIOCENT S.A. works closely with designers, contractors, investors and water and wastewater utilities, delivering solutions tailored to the specific technical requirements of each project.
